

Scale-up SG
企业腾飞计划

What is it?

Scale-up SG is a new structured growth partnership programme. The objective of Scale-up SG is to groom future global champions by helping aspiring, high-growth companies scale rapidly and become leaders in their fields. Enterprise Singapore will implement the programme, in collaboration with public and private sector partners.

Scale-up SG will be a structured programme comprising three key areas:

- 1) Facilitation by expert partners¹, to help participating companies develop strategies and drive implementation plans along priority growth themes such as innovation and international expansion;
- 2) Provide access to resources and networks required for high growth companies to realise their growth plans; and
- 3) Peer network to enable access to mentors, peer collaboration and learning.

How does it work?

Identified high growth companies will go through the programme in cohorts, aimed at facilitating peer networks, collaboration and learning. Each cohort will comprise 10 to 15 companies with similar growth profiles and priorities, with each cycle lasting 2 to 3 years.

Due to the resource-intensive nature of the programme, participation in Scale-up SG will be specific to companies that meet the eligibility criteria and are highly committed to accelerating their growth in partnership with Enterprise Singapore and its programme partners.

Eligibility criteria include: proven track record of growth, global headquarters in Singapore, strong leadership and growth ambition, and ability to create economic spin-offs for Singapore, including creating good job opportunities for Singaporeans.

A co-funding principle will apply to ensure commitment from companies participating in the programme. Up to 70% of the programme participation cost will be supported by Enterprise Singapore.

Issued on 1 Mar 2019

¹ These expert partners include Institutes of Higher Learning (IHLs), financial institutions, strategy consultants and sector experts.
