

HEALTHCARE INDUSTRY TRANSFORMATION MAP

**FUTURE
ECONOMY**

With an aging population and rising chronic disease incidence, our healthcare needs will increase in demand and complexity. The industry needs to go beyond giving care to protecting health, and move from care centres to communities.

VISION

Championing a healthy nation with our people, so that they can live well, live long & with peace of mind.

PILLARS OF TRANSFORMATION

JOBS & SKILLS

Provide multiple pathways to attract mid-career locals

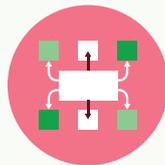

Develop community nursing and provide upgrading opportunities

Redesign jobs and enhance skills upgrading for a future-ready workforce

PRODUCTIVITY

Streamline workflows to allow healthcare workers to focus more on patient care

Scale assistive equipment and cost-effective technologies to lighten work

INNOVATION

Introduce innovative and patient-centric solutions

Encourage meaningful private sector participation in service delivery

Use technology to empower patients in care

Digitise medical records and connect healthcare providers

EQUIP YOURSELF FOR THE FUTURE...

Upskill and train the workforce:
