26 December 2019

¹ The advance GDP estimates for the fourth quarter of 2019 are computed largely from data in the first two months of the quarter (i.e. October and November 2019). They are intended as an early indication of the GDP growth in the quarter, and may be revised when more comprehensive data become available. Due to incomplete data, disaggregated advance GDP estimates will be available for the manufacturing, construction and services producing industries only.
